

InduDur

InduDur

InduDur® is our brand for operating solutions and components, which are manufactured as membrane switch packages or where the operating panel has a membrane overlay. As part of the InduKey brand family, “InduDur” stands for robust reliability, which is suitable for industrial use.

The brand’s wording consists of “Indu”, which universally stands for “industry” or “industrial”, like all the initial syllables within the brand family; “Dur” signifies “durability” and therefore the high degree of resistance to wear and long serviceable life of polyester film.

All the products and solutions within this brand are developed and assembled at our company headquarters. The spectrum ranges from a simple membrane keyboard to a touch panel with decorative film covering the entire area. The solutions and products are mainly used in the mechanical and apparatus engineering and plant construction sectors, where they distinguish themselves by providing many years of reliable service and a high degree of resistance to the development of faults.
