

Service: Resistance to materials

Service: Resistance to materials

The following information about resistance to materials should enable you to use our products without any problems. The list serves as a useful guide in the light of the variety of parameters that can affect operations and the idealised and simplified testing conditions. It goes without saying that you can contact us at any time if you have any problems.

- [Film](#)
- [Silicone](#)
- [Stainless steel](#)
- [Glass](#)
- [painted front panels](#)

If customers so wish, we can have materials tested in our laboratory to see whether they resist any chemicals that are not listed.
